

**„Dresden
goes 2D“**

WORKSHOP CHEMISTRY OF 2-DIMENSIONAL MATERIALS

WHEN

29th August 2017

09:00 – 18:00

WHERE

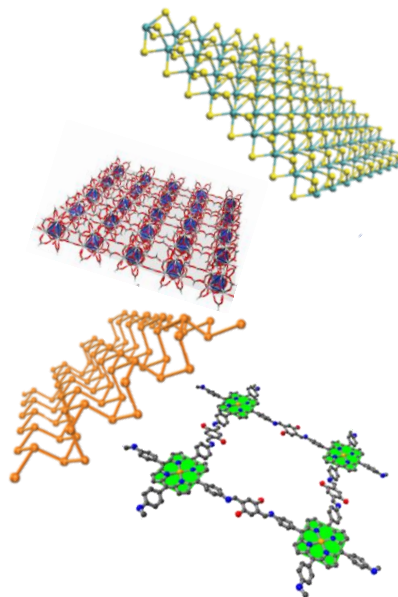

Lecture Hall CHE/89

Department of Chemistry

TU Dresden

Bergstraße 66, 01069 Dresden

INVITED SPEAKERS

Josef Breu (Germany)

Jonathan Colemann (Ireland)

Steve Erwin (USA)

Roman Fasel (Switzerland)

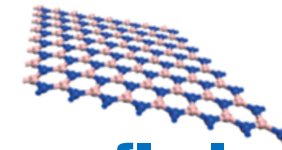

Donglin Jiang (Japan)

Rod Ruoff (Korea)

Paolo Samori (France)

Takayoshi Sasaki (Japan)

Qiang Xu (Japan)

In the last decades, Dresden established as Germany's harbour for Materials Science. Nowadays, the focus is refined to 2-dimensional materials, in detail substances that grow selectively in two directions keeping the 3rd direction at the molecular or even atomic level.

This workshop unites internationally renowned experts to share their experiences in this field of research and serves as a platform for joint discussions.
